# WEBINAR : INDIAN WATER MARKET

## ABOUT EA WATER

Everything About Water is India's leading knowledge and marketing solution provider in area of water and waste water management. They provide publishing, events, trade shows, consulting, conferences and training workshops in water sector. Their objective is to increase awareness and promote water-related offerings to a focused audience targeting India as a potential market for companies in the water sector. Since the last 20 years, they have been instrumental in forming a bridge between top International companies and Indian water and wastewater market.

## SPEAKER PROFILE

Mr. Hariharan Subramaniam has headed numerous consulting assignments on the Indian water sector for private companies, funding institutions, government bodies and trade consulates. He has worked extensively in rural community drinking water field across the country in design, product development, execution and operation activities. He has been in an advisory role with numerous government and policy initiatives on water and environment management. He is seen in the Indian water industry as a pioneer who has come out with numerous innovations like print magazine, training programs, web portal, market study reports, recruitment consulting service, industry directory – all first-of-their-kinds in India. Mr. Subramaniam is a MBA from Faculty of Management Studies, New Delhi and an engineer from Delhi College of Engineering.
