# SUSTAINABILITY ENVIRONMENT

## 12 - 14 NOVEMBER 2024 **KUALA LUMPUR CONVENTION CENTRE**

In recent times, there has been a significant push towards environmental preservation and sustainability, prompting ASEAN countries to adopt eco-friendly practices. Traditional methods like landfilling in these nations have proven inefficient and environmentally harmful. Malaysia is actively combating climate change with an ambitious goal of achieving net-zero emissions by 2050, showcasing a decade-long commitment to clean and sustainable energy solutions for broader decarbonisation efforts.

At COP 28, Malaysia prioritises key goals in addressing environmental challenges, including enhancing competitiveness, attracting lucrative investments, and propelling the economy towards a net-zero carbon future.

Furthering this trend is Sustainability Environment Asia (SEA), the latest international event dedicated to environmental preservation. Covering crucial areas such as waste and wastewater management, circular economy practices, recycling, green technologies, and more, SEA provides a platform to explore cutting-edge solutions. Join SEA to play a part in driving positive change on the path towards sustainability.

## **2nd Edition**

# THE ENVIRONMENT AND FUTURE MADE SUSTAINABLE

## SG Pavilion at SEA 2023

## **2023 Water Sustainability Mission - Site Visits**

## **Singapore Business Forum**

## **Testimonials and Media Interview**

## Mr. Chen Feng

#### Director, Industrial Water Plant HSL Constructor Pte Ltd

We are thrilled to be part of SEA, eager to connect with industry peers, explore collaborative opportunities, and contribute to addressing issues related to climate change and sustainable development. Our goal is to foster meaningful partnerships and collectively work towards continuous improvement.

## Mr. S. Gowrishankar CEO & Founder Tigernix Pte Ltd

We have met with a few water companies through this event, and also met with leaders from Air Selangor, which we had a fruitful discussion, and looking to take a step further for any possible collaboration.

## **Dr. Emmanuelle Bucaille**

### CEO & Co-Founder Pure Active Water Pte Ltd

We are very upbeat to be here, exhibiting in SEA 2023 which is also our first time in Malaysia, and we believe sustainability is very important for all industries. We have met many interesting companies and potential business clients not only from Malaysia, also from Philippines through this exhibition. This exhibition helped to expose our company to more people as well.

## Mr. Lee Tze Kang Director

#### Novexx Pte Ltd

This exhibition has exceeded our expectation, and we were able to meet a lot of decision makers, and very wellinformed visitors. We hope to be able to convey our technologies and common aspirations to protect the environment. We will definitely return for future exhibition.

This is the first time that the Singapore Water Association (SWA) participating and managing the Singapore pavilion at SEA 2023, and brought along a consortium group of companies, including HSL Constructor.

Through this event, we are looking for collaboration with entities such as the Malaysia Water Association, SPAN, and Air Selangor, and there were already some exchanges among us. We will deepen our discussions because there is interest in some of the technologies and the possibility of some adoption in Malaysia as well.

SWA also have organised a Singapore Business Forum to explore business-to-business matchmaking and business partnerships, which we had benefitted from by exposing our company's branding and our capabilities in the water industry.

SEA 2023 event is a great platform for business communities to move from competition to cooperation to collaboration as well as co-creation of solutions for the betterment of humanity.

## **Mr. Charles Quek**

SWA Vice-President (General Affairs) HSL Constructor Pte Ltd (CEO)

Sustainability Environment Asia 2023 focused on advancing environmental sustainability in the Asia-Pacific region, drawing leaders from across industries to discuss innovative strategies for achieving greener outcomes.

Key takeaways from the event include:

- Climate Action Collaboration: The conference emphasised the importance of cross-industry collaboration to address climate change. Participants highlighted successful partnerships between governments, businesses, and NGOs, demonstrating that coordinated action leads to more effective environmental solutions.
- Technological Innovation: Advances in technology, particularly in renewable energy and waste management, were showcased as essential tools for sustainability. Attendees were encouraged to adopt innovative solutions like solar and wind energy, as well as AIdriven waste reduction techniques.
- **Circular Economy Practices:** The concept of a circular economy gained significant traction, with case studies illustrating how businesses can reduce waste by reusing and recycling materials. This approach was identified as a key driver for reducing the environmental impact of production and consumption.
- Corporate Responsibility and ESG Reporting: There was a strong focus on corporate responsibility, with discussions around environmental, social, and governance (ESG) reporting. Companies were urged to adopt transparent practices and set clear sustainability goals to meet stakeholders' expectations.
- **Community Engagement and Education:** The importance of community involvement and environmental education was stressed, with the consensus that lasting change requires public awareness and participation.

**Overall, Sustainability Environment Asia 2023 underscored the urgency of environmental action** and the need for collaborative, innovative, and transparent approaches to sustainability.

## 12 - 14 NOVEMBER 2024 KUALA LUMPUR CONVENTION CENTRE

## **Programme 1: 2024 Business Mission**

## Site Visit 1: Visit to Coca-Cola's Bottling Plant TBC

## Purpose of the Visit

The visit aims to gain a comprehensive understanding of the bottling plant's operations, manufacturing processes, and quality control measures. It will also provide an opportunity to build relationships with the local team and discuss future collaborations.

## **Objectives**

- Operational Insight:
- Stakeholder Engagement:
- Future Opportunities:
  - with the Coca-Cola team.

• To observe the plant's production lines and understand the workflow, technology, and efficiency measures in place.

• To meet with key stakeholders and establish a collaborative relationship that fosters open communication and problem-solving.

• To explore potential areas for expansion, innovation, and joint initiatives

## Site Visit 2: pending arrangement to one of the industrial plant (end-user) TBC

As part of our ongoing efforts to strengthen relationships with key partners and enhance our understanding of industrial operations in the region, a visit to an industrial plant in Nilai has been proposed. Here is a summary of the need for this visit and the objectives we aim to achieve:

#### Purpose of the Visit

The primary reason for visiting the industrial plant in Nilai is to gain firsthand insight into the plant's operational processes, machinery, and compliance with industry standards. This visit will allow us to establish a closer working relationship with the plant's management and explore potential areas for collaboration.

## **Objectives**

- for improvement.
- for future cooperation.
- priorities is essential for this purpose.
- efficiency and sustainability.

• Operational Understanding: To observe the plant's day-to-day operations, including production workflows, equipment, and workforce management. This will help us understand their efficiency and identify any opportunities

• Relationship Building: To engage with key stakeholders at the plant, fostering a collaborative relationship that can lead to mutual benefits. This will provide an opportunity to discuss current challenges and explore areas

• **Exploring Business Opportunities**: To identify potential business opportunities, such as partnerships or service agreements, that could benefit both our organisations. Understanding the plant's needs and

• Learning Best Practices: To learn from the plant's successful practices and innovations, with the goal of applying these insights to our operations. This knowledge exchange can contribute to our ongoing efforts to improve

## **Programme 2 - Singapore Business Forum**

## The Singapore Business Forum (SBF) has gained a reputation as the premier event for industry professionals, particularly for those showcasing at the Singapore Pavilion.

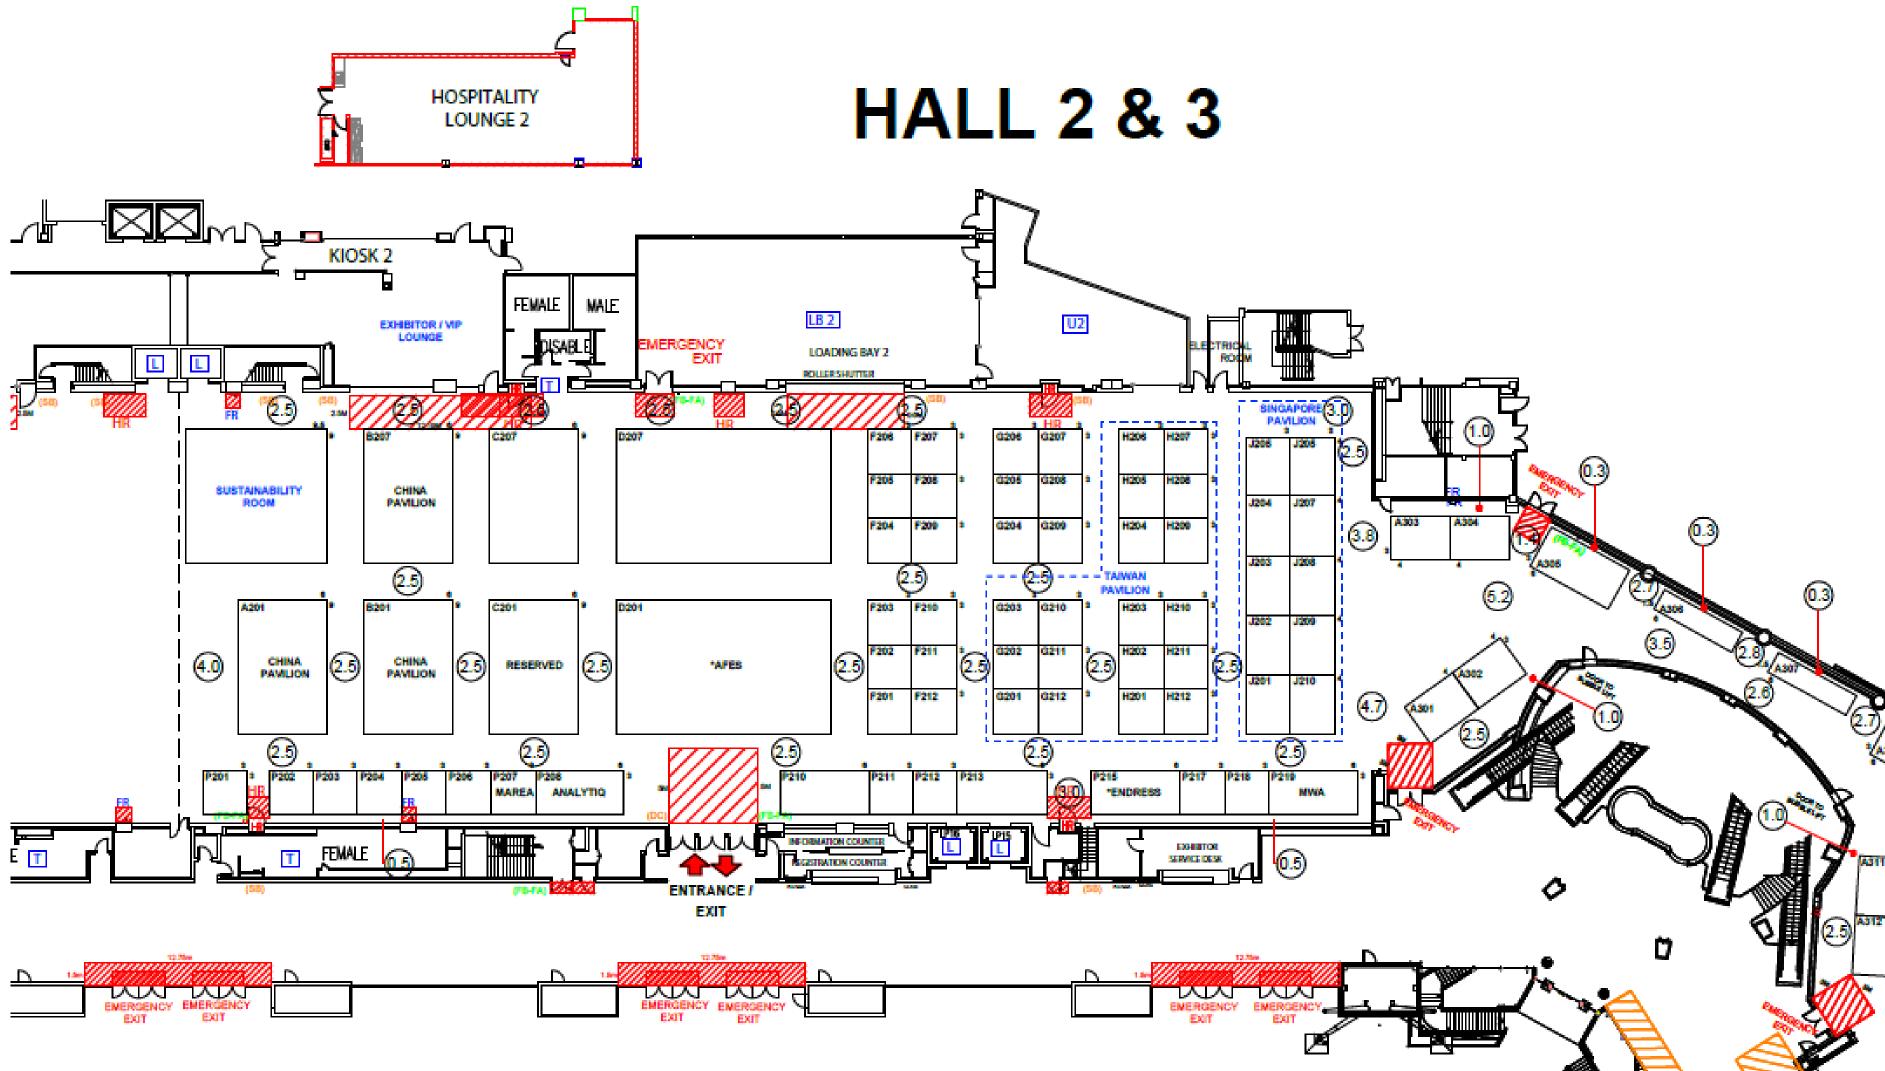

- the SBF attracted a diverse group of companies specialising in water technology, point for industry stakeholders.
- **Networking and Collaboration:** The forum facilitated extensive networking industry. The layout of the Singapore Pavilion encouraged interaction, leading to meaningful discussions and potential business collaborations.
- Business Opportunities and Deals: Many exhibitors reported successful business exploring business opportunities.

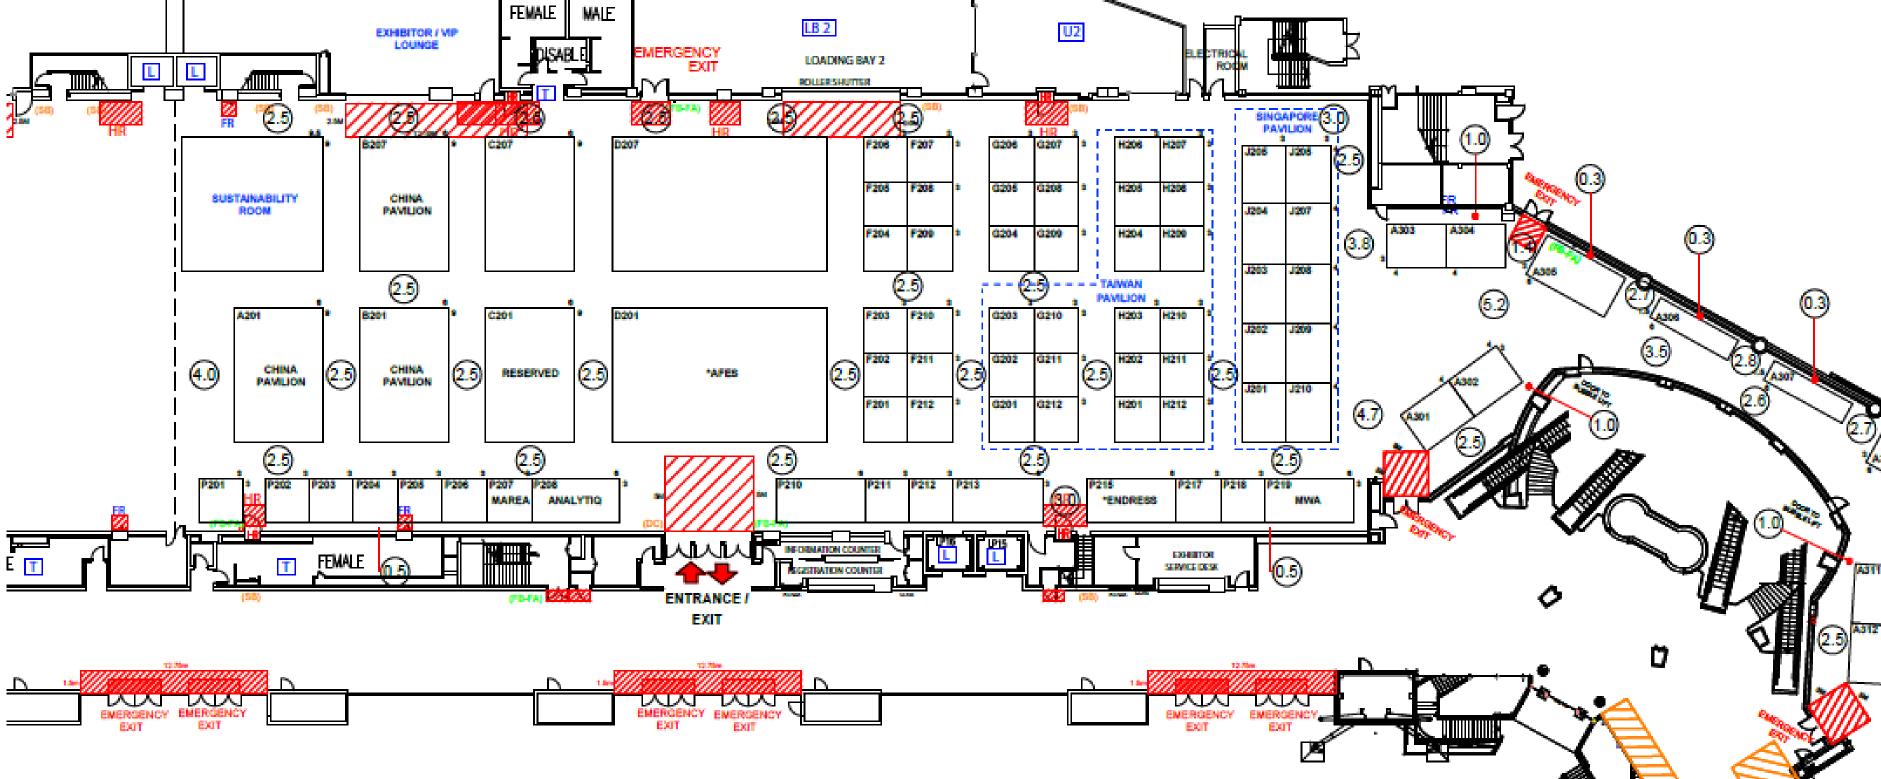

**Overall, the Singapore Business Forum emerged as the highlight event for Singapore** Pavilion exhibitors, offering unparalleled networking, collaboration, and business opportunities. It solidified its status as the most popular event for professionals in the water industry, providing a platform for growth and engagement.

• Major Draw for Exhibitors: As the most popular event for Singapore Pavilion exhibitors, infrastructure, and sustainability. This broad representation made it a key gathering

opportunities, allowing participants to connect with other professionals in the water

outcomes, including new leads, partnerships, and deals. The SBF's reputation as a focal point for industry growth played a significant role in drawing visitors interested in
