

# Advancing Sustainability with Sustainable Energy Solutions

**10 October, Thursday**  
**2pm – 5pm**

180 Clemenceau Ave, #03-02/04,  
Haw Par Centre, Singapore 239922

**REGISTER NOW**

As sustainability becomes a global priority, the water industry is stepping up to incorporate sustainable practices into business operations: from optimising energy and water consumption, to improving efficiencies while minimising environmental impact.

In collaboration with SP Group and SP Digital, this event takes a holistic approach in examining how deploying smart utilities management can drive your sustainability agenda.

## Sustainable Water Management with Green Energy Tech (GET™)

**Mr Giles Chua**

Assistant Director  
Smart Building Solutions,  
Sustainable Energy Solutions, SP Group

Giles started his professional career as a project engineer, before moving on to business development and accounts management. He has over 10 years of experience in built environment sectors such as commercial buildings and data centres.

At SP Group, he is currently responsible for growing key accounts and driving engagement and adoption in commercial and industrial sectors.

Brendon is a specialist in emission and carbon matters in SP Group, taking charge of the yearly sustainability report and being part of initiatives to adopt international standards and guidelines.

Passionate about nature and sustainability, Brendon channels his efforts to help SP Group and its partners navigate the world of corporate sustainability by formulating solutions and conducting training.

## Charting Your Path Towards Sustainability through Carbon Footprint Reduction

**Mr Brendon Tan Choon Kiat**

Executive Officer  
Strategy & Sustainability, SP Group

## Moving Towards a Green Future with Sustainable Mobility

**Ms Ooi Chel-Lin**

Deputy Director  
SP Mobility, SP Group

Chel-Lin is the Head of Network Development, responsible for the growth and safe deployment of the network, and generating usage for the network.

She has a degree from NUS in Mechanical Engineering and over 20 years' experience in sales, key account management, business development and operations. She is a project management professional and has successfully delivered several large scale projects.
